8	SP 905043 HP16 9JH	Lee Common Scout HQ	34	6	Leave HQ turn right and follow road and then FP to SP 906 041 , follow path on right down the hill, through the gate at SP 906 039 , follow track to SP 904 038 , then left via SP 905 037 , SP 903 033 , SP 902 030 to (was CP1A) turn right Follow road (take care) for 25 M then path at SP 901 027 , and then FP to SP 895 017 , use underpass to cross under A413. Follow path to SP 897 011 (take care crossing road), then by road to finish SP 897 007
Finish	SP 897007 HP16 0BN	Misbourne school	40	0/0	WELL DONE. You have done nearly a marathons in less than 14 hrs with kit over rough terrain

Endurance 40 Route 2020 v1.2 40km 14 Hours

Course notes, tips & ideas

- Use Google Earth & Street View and “Grid Reference Finder” when plotting the course, but remember the use of GPS navigation is not permitted except in an emergency
- There is still some road walking but where possible it has been reduced. However, there are a number of paths that break out onto roads and in some cases with poor visibility left & right, Note these locations.
- Beware Rabbits!! There are a number of locations on the route that have a healthy rabbit population and they don't mind where they dig burrows or in particular bolt holes which are often away from the main warren and all too frequently close to bridleways and footpaths. These bolt holes are often ‘camouflaged’ (cunning devils these rabbits!) and hard to see in daylight let alone the dark...stay alert to their possible presence, typically close to hedges and fences
- Many of the bridleways see heavy use from horses and ‘mountain bikes’ and it is common to come across them in daylight hours, the bikes are a particular hazard especially if coming from behind as you may not hear them. Depending on weather conditions these two users can leave sections badly rutted; creating very boggy areas or hard, sharp, cratered sections adapt and twisting the ankle of the unwary. Been there, done that, not good!
- Here's an idea to increase your visibility to road users or people searching for you. In addition to torches and the Hi-Vis jackets try a small 'cycle' lights attached to your rucksack, or try sticking some reflective tape to prominent areas of your rucksack to increase the probability of being seen at night. Don't have to be big sections of tape, small but numerous strips on key bits like the end of straps, shoulder strap etc. is just as good if not better. The fact that some parts of the pack with the tape on will move only serves to catch the eye. It's very effective and needs no batteries. One possible reflective tape supplier. <http://www.glow.co.uk/reflective-tape.html>
